aprilia

#be **a** racer

WELCOME TO THE APRILIA RS DYNASTY

Authentic Aprilia RS design: The RS 457 - a true sporting thoroughbred, hailing from a unique motorcycling culture and a race-winning history. Powerful and fun, ease of riding and lightness, boasting the best power-to-weight ratio in its class. The grit of the unmistakable RS range featuring a state-of-the-art technology and chassis architecture inherited from higher-category super sports bikes.

ENJOY THE DNA OF A SUPERBIKE

The Aprilia RS 457 is powered by an ultra-tech, high-performance, liquid-cooled parallel-twin DOHC four-valve engine. Mounted on the aluminium alloy chassis, it creates a vehicle with a dry weight of just 159 kg, unbeatable in terms of power-to-weight ratio.

REAL RS MOOD

Agile, dynamic and easy to handle without losing its sporting DNA and higher-class performance, the RS 457 is the fairing bike giving dynamic younger riders the chance to explore the legendary Aprilia RS range. The clip ons above the steering plate are an excellent compromise between a sporty, road-bike style and the ergonomic needs for an outstanding handling.

The Aprilia RS 457's standard electronic package with Ride by Wire system, adjustable traction control and three riding modes put it in a true sports bike class.

AUTHENTIC RS STYLE

The iconic features of the RS super sports bike models, such as the double front fairing and 2-in-1 exhaust set up with underbelly silencer integrated with the belly pan, all convey the sporting nature of the RS 457. The full LED front headlamp is a nod to the entire RS range lighting system and incorporates the front indicators. The handlebar controls are backlit, and the 5-inch TFT display is in colour.

BOLD ATTITUDE

The dynamic qualities and ease of handling come down to the design choices made to reduce the weight, such as the aluminium frame and load-bearing engine block. The chassis architecture makes for bold, safe riding. The fork offers preload adjustability, the braking system features a single radial-mount 4-piston calliper pinching a 320 mm disk up front and a 220 mm disk up back, with dual-channel ABS and dual-map settings. The 17" sport wheels provide support that is stable but always quick and responsive.
